SIGNOS CONVENCIONALES

The diagram illustrates a multi-modal fusion framework for multi-modal multi-label classification. It is divided into two main sections: **Input** and **Output**.

Input Section:

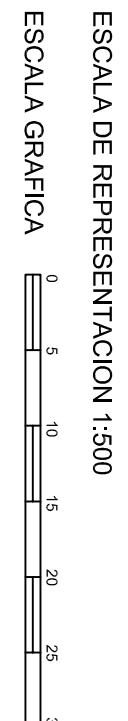

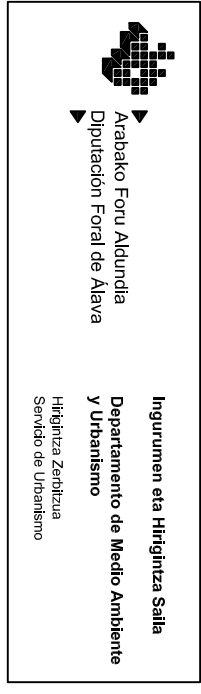

- Text Input:** Represented by a document icon, it is processed by a **Text Encoder (TE)** to generate a **Text Embedding (TE)**.
- Image Input:** Represented by a landscape image, it is processed by an **Image Encoder (IE)** to generate an **Image Embedding (IE)**.
- Fusion Module (FM):** This module takes both the **Text Embedding (TE)** and **Image Embedding (IE)** as inputs and produces a **Fusion Embedding (FE)**.

Output Section:

- The **Fusion Embedding (FE)** is fed into a **Multi-Label Classifier (MLC)**, which outputs the final classification results.

Legend:

- TE: Text Encoder
- IE: Image Encoder
- FM: Fusion Module
- MLC: Multi-Label Classifier
